# TELESKOP GARMENT LAUNDRY MANAGEMENT SYSTEM

## Revolutionizing Efficiency for Garment Laundries

### Efficient, Adaptable, and Easy to Use

Managing garment laundries can be complex, but **Teleskop Garment** by Eliar makes it simpler. Teleskop Garment software brings all your laundry processes together in one place, offering real-time monitoring, intuitive tools, and insightful reports to help you run your operations smoothly. Built on a robust SQL-based open database structure and client-server architecture. Designed with flexibility and practicality in mind, Teleskop adapts to your needs, whether you're running a small operation or a large facility.

# WHAT MAKES TELESKOP STAND OUT?

## 1. Process Monitoring: See Everything at a Glance

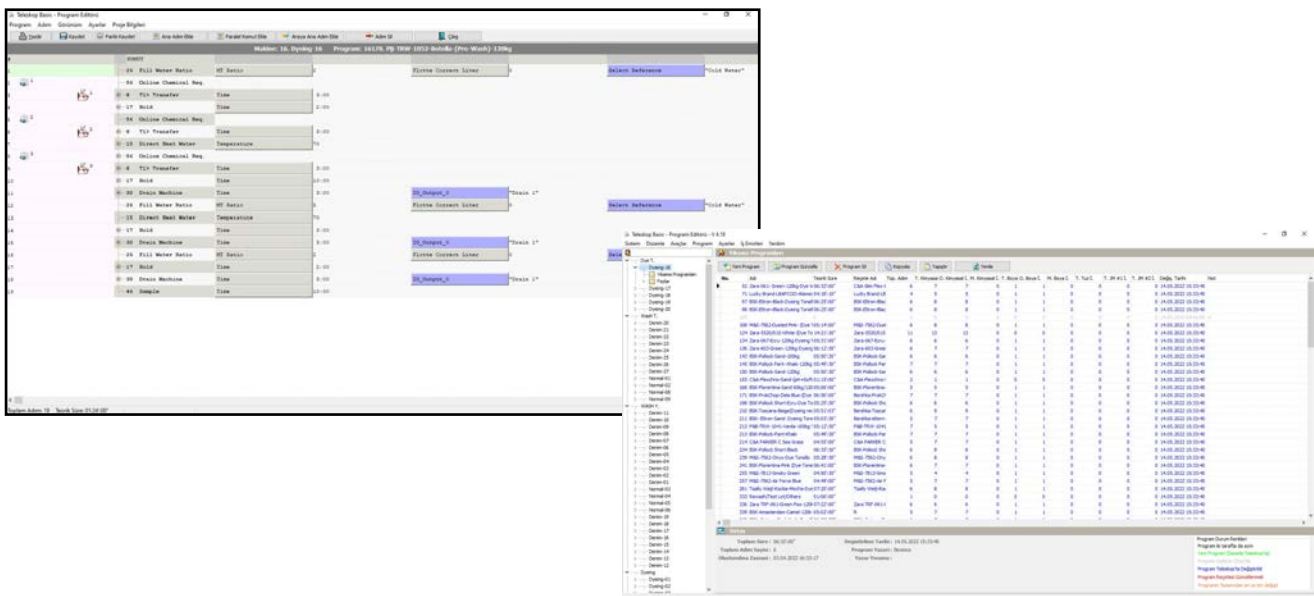

Teleskop lets you keep track of all your machines from a single screen, giving you a complete picture of your operations.

- **Live Monitoring:** View operating statuses, track deviations, and respond instantly to alarms and operator interventions.
- **Data-Driven Insights:** Analyze critical parameters such as tank temperatures, water levels, and dosage charts through customizable graphical interfaces.
- **Historical and Instant Analysis:** Combine historical batch data and live updates for a holistic view of processes, enhancing traceability and operational reliability.

## 2. Program Editor: Simplify Process Management

Managing washing and dyeing processes has never been easier. The Program Editor provides tools to create, edit, and optimize programs.

- Use visual tools like temperature-time curves to design process steps.
- Group machines and commands based on your setup for streamlined management.
- Avoid repetitive tasks with the **Phase Parameter** feature, saving time and reducing errors.

### 3. Unique Design for Your Needs

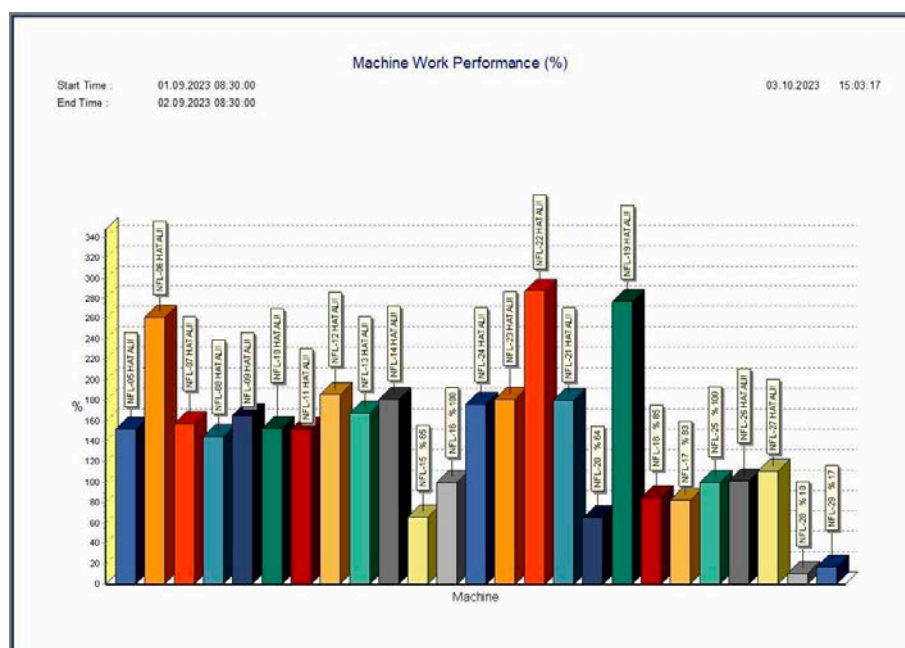

Machines have very different functions with features such as type, brand, model. ELIAR control devices can easily adapt to all discontinuous machines, regardless of brand and model, thanks to their 100% flexible structure. With the Project configuration software specially designed for the use of system integrators, technologists or technical service team, all function behaviors can be managed, moved between machines and backed up.

- Compatible with all machine types, brands, and models.
- Easily configure settings specific to your machines and save them for future use.

### 4. Comprehensive Reports: Make Informed Decisions

Transform raw data into actionable insights with Teleskop’s robust reporting capabilities.

- Generate detailed reports on efficiency, machine performance, and resource usage (water, electricity, steam, chemicals).
- Export reports in various formats such as Excel and PDF for effortless sharing and presentation.
- Maintain comprehensive archives, ensuring all process data is securely recorded and easily accessible.

## 5. Customizable Dashboard, Anytime, Anywhere

Machine control is not the only requirement of a laundry. Management must have appropriate data tools in order to be able to look at the instant critical indicators of the business and to get status information in the fastest way. Dashboard offers fully configurable summary indicators accessible from your tablet or mobile phone. By designing selective screens such as Factory Efficiency, Stops and Causes, Consumption Costs, Production Charts, you are constantly monitoring your business regardless of location.

Stay updated on critical indicators with fully customizable dashboards.

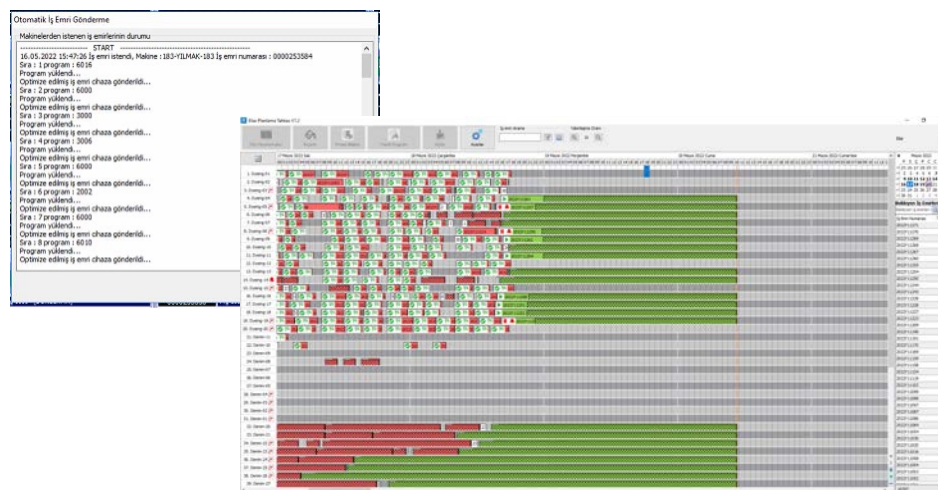

- View key metrics like efficiency, production trends, and downtime causes on your tablet or smartphone.
- Create screens that show exactly what matters to you, no matter where you are.

## 6. Planning Board: Smarter Scheduling

Planning board is the software module that enables planning of all machines from a single screen and monitoring the machine statuses live. You can plan your finalized production job orders to the target machine with drag-and-drop logic and monitor the theoretical end times.

Organize and streamlined production processes:

- Schedule job orders with drag-and-drop simplicity.
- Track order statuses, operator interventions, downtime reasons, and theoretical process times in real-time.
- Optimize production transitions and identify inefficiencies instantly.

---

## 7. Mobile Access: Monitor from Anywhere

You can monitor the instant status of the machines live with any internet browser. Values such as batch status information, alarms, operator intervention, downtime and its reason, running program and step, time to batch end can be monitored over the internet or network with the Mobile Laundry Monitoring feature. With the browser-based architecture, platform-independent access is provided without the need to download a special application.

Stay connected to your operations wherever you are.

- Track batch progress, alarms, operator actions, and downtime reasons from any internet-enabled device.
- Platform-independent architecture eliminates the need for additional apps, simplifying accessibility.

---

## 8. Integration Services: Seamless Connectivity

This service manages 100% flawless integration with any 3rd party Dispenser Managers, ERP or Recipe software. It allows information such as chemical dispensing, inventory or job order to be recorded in the Eliar System. It also transfers detailed information about running processes to ERP software.

Teleskop Garment's integration service bridges the gap between your laundry operations and ERP systems.

- Synchronize any data, and detailed process information effortlessly.
- Achieve operational harmony with real-time data sharing and updates.

# UNLEASH THE FULL POTENTIAL OF YOUR GARMENT LAUNDRY

With its innovative modules, user-friendly interfaces, and robust architecture, **Teleskop Garment** transforms garment laundry operations into a model of efficiency and precision. From live monitoring to advanced reporting, it equips businesses with the tools needed to excel in today's competitive textile industry.

## Why you should choose Teleskop Garment?

- Uninterrupted traceability and control.
- Advanced tools for planning, monitoring, and reporting.
- Scalable, adaptable, and compatible with all machine types.
- Remote access and mobile connectivity for 24 / 7 management.

Invest in **Teleskop Garment** today and elevate your garment laundry operations to the next level.
